

Sujith Learns Jira (13 April 2025)

Board

This is the place where all the issues will be displayed.

You can change the status of any task, You can also assign a task to a person or teammate.,

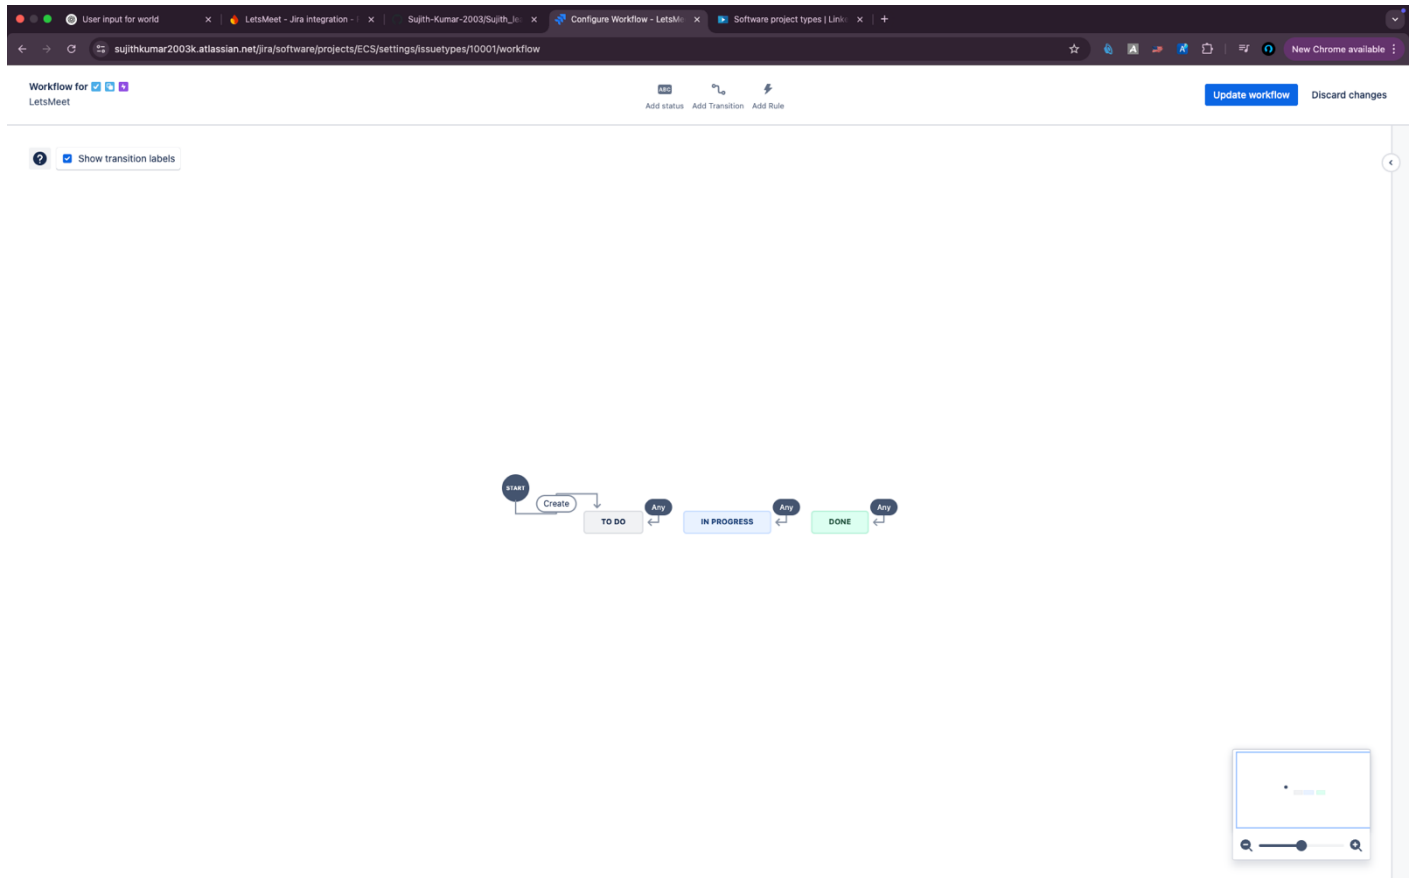

Board Types

There are 2 types of Boards:

1. Scrum Board: This board has issues where the work is delivered as sprints,. Eg: every 2 weeks.
2. Kanban Board: Here work is delivered continuously as soon as a task is done. No set interval.

Kanban is mostly used when there is usually a backlog of work to do.

You can edit out Workflow for the definition of how work is done in a company, what is the order of tasks to be done to complete the work in a proper order.

There are many types. Just read them as you progress by creating new projects on the way.
